

# Rain Flooding

**Low Walkway**

**Water at Entrance**

**Splashing Wheels**

**Raised Detour**

**Clogged Outflow**

**No Overflow Route**

# **Rain Flooding**

1. Which two scenes stop a person from staying dry?
2. What happens on your usual route after heavy rain in Rajshahi?
3. Should a team raise a walkway or clear an outlet first? Why?
4. Why does water return to the same place after rain?
5. If water is sent down another lane, who could be affected?
6. You have 350,000 BDT and 30 days. What one flood-route change would your grant test?
