

Groundwater Drop

**Lost Rainwater, Thirsty Crop,
Carrying Water, Lower Well,
Dry Field, Long Pumping**

Groundwater Drop

1. Which two scenes show water becoming harder to reach?
2. How do people you know manage water in the dry season?
3. Should water go first to drinking needs or crop irrigation? Why?
4. Why might a farmer keep pumping even as the water level falls?
5. If pumping is reduced quickly, what happens to a farmer's income?
6. You have 1,000,000 BDT and 30 days. What one water-saving pilot would your grant test?
